# Big Print Autumn Word Search

Seven sample pages, at full size

## INSIDE

- Measure it yourself: the ruler page
- Puzzle 1 · Falling Leaves, word list and grid
- Puzzle 2 · Harvest Time, word list and grid
- Their answers, from the back of the book

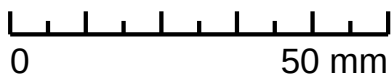

**Printing tip** · Print at **Actual size** or **100%**, not “Fit to page,” so the letters print at their true 8.5 mm and the ruler measures true.

# MEASURE IT YOURSELF

Most large print books tell you a point size. Point size is a typographic measurement, not a promise about what reaches the page, which is why so many large print books still read small.

This book tells you the letter height in millimeters, and gives you a ruler so you can check it.

**This bar is exactly 50 millimeters long:**

**Every puzzle letter in this book:**

**A B C D E**

I

**Capital height: 8.5 millimeters.**

Hold the ruler bar above against any capital letter in the puzzles. It should measure what this page says it measures.

Printed in 100% black ink on white paper, with nothing decorative on any puzzle page.
