How to use this book

Every puzzle has a Christmas theme, from trimming the tree to packing it all away in January. The theme is at the top of the page, and every word in the list belongs to it.

Every puzzle takes two facing pages. The words are listed on the left, in alphabetical order, and the grid is on the right with nothing else on the page. Each word appears in the grid exactly once.

The book is in three sections. In the Easy section, words run across and down only. In the Medium section they also run on the diagonal. In the Hard section they can run in any of eight directions, including backwards.

Answers begin after the last puzzle. Each solution is written out in words: the row, the column it starts in, and the direction it runs. Rows are counted from the top and columns from the left, both starting at one.

There is no time limit and no score. That is the point.

EASY

Words run across and down only.
